Company Profile: Founded in 2003, Marieke Consulting, Inc. is a woman / veteran-owned and operated small business headquartered in the Washington DC metropolitan area. We pride ourselves on our team of talented, versatile, and highly skilled analysts, managers, engineers, developers, and subject matter experts. We provide services in the areas of systems analysis and design, data analysis and reporting, and software development and integration. Marieke Consulting has supported the Federal Aviation Administration (FAA) continuously since its inception under multiple Prime and subcontract vehicles.

⭐ VALUE ADDED SERVICES ⭐

Where our expertise and experience in our core services combine, the Marieke team provides extra value to our clients needing a beginning to end solution. Marieke Consulting has successfully provided services to the FAA in the areas of on-site financial and payroll analysis; software development of financial systems; data integration and analysis of project management, performance, resource and financial data; and complete data-driven website redesign for an enterprise wide portal. Marieke Consulting will leverage these proven techniques to:

Provide user-centric solutions leveraging our knowledge of business processes and data

Capture and nurture client requirements throughout system lifecycle for continuous improvement

Integrate technology solutions with business processes to maximize benefits
